FABIÁN TUREO

MERN FullStack Developer

📞 +54 294 468-0336 (WhatsApp) @ fabianestebantureo@gmail.com
📍 Remote 🔗 https://github.com/ftureo/

CAREER SUMMARY

Full Stack Developer with experience in JavaScript environments, including hands-on work and extensive experience with the MERN Stack and Javascript technologies. Experienced in utilizing cloud services such as DynamoDB, CloudFormation, S3, Lambda, API Gateway and more. (AWS). Additionally, I enjoy pair programming and mentoring beginner and trainee developers as Full Stack Mentor.

WORK EXPERIENCE

Full Stack Developer
UMA IA Salud + Emergencias (via AccionalT)
📅 Mar, 2025 - Jun 20205 📍 Remote - AR

- Spearheaded optimization of core shift-assignment product, improving responsiveness, information hierarchy, and modularity across 15% of key user interfaces using Next.js.
- Implementing the first observability layer by integrating Next.js server logs with Google Cloud LogExplorer and extending custom TypeScript-based error tracking system.
- Adopted Google Cloud Platform (GCP) as the main cloud environment after professional experience with AWS, enhancing knowledge in cloud architecture, CI/CD pipelines, and cost-effective deployments.
- Reduced technical debt by over 10% through scalable architectural decisions and proactive codebase improvements aligned with product growth anda data driven focus

Full Stack Developer
Abogarte
📅 Dic, 2024 - Feb, 2025 📍 Remote - AR

- Chose Next.js v14, Strapi v4 and NestJS to build a modern, componentized, and scalable fullstack application, architecting a modular UX, configuration layers, and API POC dashboard; documented all endpoints with Swagger and set up Winston logging.
- Developed backend endpoints for user reviews and slider image management, ensuring rapid iteration and a comprehensive handover package—clean codebase, deployment scripts, and guidelines—so the startup team can continue development independently.

Full Stack Developer
Club LA NACION
📅 Oct, 2022 - Sep, 2024 📍 Remote - AR

- Developed a Strapi v4 CMS dashboard to enable homepage customization and centralize configuration management.
- Integrated AWS Lambda, DynamoDB, S3, and CloudWatch in an Event-Driven Architecture; automated deployments via CloudFormation (IaC).
- Implemented Google Pay and Apple Pay wallet services, building a Node.js API on Lambda + DynamoDB for real-time subscription-based credential status updates.
- Automated CSV generation and partner data synchronization, storing files in S3 through Lambda functions following the EDA pattern.
- Enhanced the main web product by fixing bugs, scaling features, and growing with new functionalities; integrated GA4 metrics, used Redux for centralized state, applied a layered architecture, and optimized SSR for per-request accuracy.
- Collaborate with the API v1→v2 migration in a microservices/EDA framework (Lambda, DynamoDB, MSSQL/MySQL/Aurora, S3, SQS, Elasticsearch).

Backend Developer - Proof of Concept & MVP Development
Abogarte
📅 Jul, 2024 - Dic, 2024 📍 Remote - AR

- Utilizing my knowledge of JavaScript, Microservices Architecture, Backend Programming, and essential REST API concepts, I initially developed a *PoC* using Python for exposing API endpoints for queries, authentication, and data retrieval, integrating Python v3.8, Django REST, SQLite, JWT, and bcrypt. Additionally, I have explored Data Science tools such as Google Colab, Matplotlib, NumPy, etc.

Full Stack Developer
BuyBye Brasil
📅 Feb, 2024 - May, 2024 📍 Remote - BR

- Worked on migrating from a monolithic API to a microservices-based API, enhancing business scalability, ensuring singular responsibilities in each process, and achieving a 40% improvement in response times. Utilized MVC and Repository patterns, leveraging Sequelize as ORM, Node.js + TypeScript, and Docker.
- Integrated into a new work culture as the entire team was based in Brazil, enhancing my conversational Portuguese in an agile environment (dailies, feedback sessions, requirements gathering, etc.).

SKILLS

Languages

Spanish: Native

English: B2 - Upper Intermediate

Portuguese: Conversational

Client Side

HTML   Javascript   Typescript

React   Redux   Zustand

CSS   Tailwind   Shadcn   Bootstrap

Performance Optimization   Metrics

Server Side

Node.js   Express   Strapi   Rest API

SQL   Sequelize   NoSQL   Mongoose

Python   Django

Ops (Cloud Computing & DevOps):

AWS   Lambda   DynamoDB   S3

API Gateway   CloudFormation   SQS

CloudWatch   Firebase   Docker

Git / Github   CI/CD   Azure Pipelines

Complements

Datadog   Jest   Unit Testing

SCRUM   Agile

STRENGHTS

📢 Strong communicator

🔍 Analytical thinker

🌎 Culturally adaptable

📚 Continuous learning mindset

⚡ Constantly growing

Mentor - Programming
Rolling Code School, MindHub, Accenture, Avalith, i.e
📅 From Oct, 2022 (Multiple Occasions)
📍 Remote - AR

- Great experiences sharing knowledges with Beginner and Junior level developers in JS-related techs stack.

Full Stack Developer
IbisDev
📅 Oct, 2021 - Abr, 2022 📍 Remote - AR

- First work experience with main challenge to grow mi tech stack using Vue.js (specifically Nuxt.js) and TailwindCSS.
